Dear Metro-West Steelheaders,

Thank you for your generous donation in support of Lake Superior State University's Aquatic Research Laboratory (ARL). We would also like to thank Jeff Bustos for his support and presentation to your board on our behalf. We plan to use these funds to support our student research projects on fishery and water resource issues in the Great Lakes basin.

This is an exciting time at the ARL. We are planning to expand our facility and relocate to the other side of the hydro plant. The relocation will enable us to increase our student training opportunities, research collaborations, and outreach projects to the community. Attached are some copies of our newsletter which highlight the building donation and our future plans.

If both of our schedules permit, we would be willing to come down and give a presentation to your club on what the ARL is about and what we do. We typically do not request a speaker fee, but it would be appreciated if the group could cover associated travel costs.

Again, thank you for your support. We are very appreciative of your contribution.

Sincerely,

Roger W. Greil
