

Lake Sturgeon are an important piece to the Great Lakes fisheries. Refer to the links below to learn many facts about this unique fish as well as how Wisconsin & Michigan work together to add 19 Miles of prime spawning habitat to bypass two hydroelectric dams on the Upper Peninsulas Menominee River. The second link tells a great story of a Christmas Wish that yields an 80" Catch for a 9 yr. old Carsonville Boy. The Third entry is a link to Greatlakesnow.org episode 2201, segment 3, a recent show that tells of a Michigan Tribal "Sturgeon in the Classroom" effort (Way cool!).
